PLASTİK TEKNOLOJİSİNDE MÜHENDİSLİK ÇÖZÜMLERİ

ENGINEERING SOLUTIONS FOR PLASTIC TECHNOLOGY

Planet Plastik termoplastik enjeksiyon kalıpları hususunda uzmanlaşmış yeni teknolojiye önem veren bir mühendislik firmasıdır.

Planet Plastic specializes in providing solutions for your thermoplastic injection molding and tool design with using latest technology.

Planet Plastik size komple mühendislik hizmeti ve desteği sunuyor. Kalite, görünüş ve fonksiyonları bakımından yüksek endüstri standartlarında ürün yapabilmek ve zamanında size teslim edebilmek için gerekli olan tüm teknoloji, bilgi ve tecrübeye sahibiz.

We offer complete engineering assistance and support. We have the knowledge, technology and experience to develop, produce and deliver on time, a product that sets the industry standard in appearance, quality and functionality.

Yüksek kaliteli ürün ortaya çıkartmak için en ileri CAD/CAM sistemleri, CNC tezgahları ve en son teknoloji enjeksiyon makinalarını kullanıyoruz.

We design using state-of-art CAD/CAM systems and manufacture on precision, computer-controlled machine tools. The very latest in injection molding machines are used.

YENİLİK, KALİTE VE EKONOMİK

INNOVATION, QUALITY and ECONOMY

Müşterilerimizin ürün geliştirme departmanları ile iş birliği yaparak, ihtiyacınızı mükemmel karşılayan ürünü sizin için üretiyoruz ve burada ürünün kalitesi, hızlı üretimi ve ekonomik olmasına odaklanıyoruz.

We collaborate with our customers R&D departments to produce perfect products that meets all requirements. And focusing on; in speed of production, product quality and economy.

- Endüstriyel tasarım ve ürün geliştirme
- Numune parçadan ölçü alma, digitizing
- Parça modellenmesi
- Kalıp dizaynı
- Kalıbın imal edilmesi
- Kalıbın enjeksiyon baskısı

- Industrial design and product development
- Digitizing and reverse engineering
- Part design
- Mold design
- Mold manufacturing
- Plastic Injection

ÇİFT RENKLİ ENJEKSİYON

MULTICOMPONENT INJECTION

Planet manufactures molding tools using the latest technology and machinery available. Planet was founded in 1996. We specialize in the design and manufacture of mold tools for plastics processing industry. Planet is not only a mold manufacturer but is your ideal business partner. All our tooling is manufactured to the highest quality standards and levels of precision.

We have established a long-term partnership with our customers and provide the high quality products to end users.

On our one-component and multi-component machines, we produce plastic parts made of all common plastics for our customers.

The clamping forces of our new ARBURG injection moulding machines range from 100 to 200 ton, allowing them to achieve handling of shot weights of between 0,3 and 350 gr.

Our ARBURG multi-component injection moulding machine is equipped with rotary tables.

Our motivated team of professionals are committed and will help supervise your project from its conception to final delivery. First-rate quality, on-schedule delivery and a competitive price structure is our mission.

If you ever have any questions or specific concerns, we are there for you and can approach your requests in a flexible manner. With all our know-how
